

Chaima Mami

Network Infrastructure & Data Protection Engineer | Software Developer

chaima.mami@esprit.tn | +216 50 666 650 | Ariana, Tunisia

LinkedIn | GitHub

PROFESSIONAL SUMMARY

- Network Infrastructure and Data Protection Engineer, graduated from ESPRIT on July 20, 2026 with **Highest Honors**.
- Hands-on experience in **full-stack development, cybersecurity, banking systems, DevSecOps, cloud, networking, microservices, and privacy-preserving AI**.
- Open to full-time opportunities in **software development, cybersecurity, DevSecOps, cloud engineering, network security, or AI-powered systems**; available immediately.

EDUCATION

Engineering Degree in Network Infrastructure & Data Protection

ESPRIT – Private Higher School of Engineering and Technology, Tunisia

2023–2026

Graduated July 20, 2026 – Highest Honors

Bachelor's Degree in Computer Systems Engineering

ISI Ariana – Higher Institute of Informatics, Tunisia

2020–2023

Graduated with Highest Honors

TECHNICAL SKILLS

Programming & Development: Python, Java, C, C++, PHP, SQL/PLSQL, TypeScript, Spring Boot, FastAPI, Angular

Frameworks & Databases: Django, Symfony, .NET, Oracle, PostgreSQL, SQLite, SQLAlchemy

Cybersecurity: Azure Sentinel, Defender for Cloud, AD PIM, Wazuh, TheHive, Cortex, MISP, Wireshark, Nmap

DevSecOps: Docker, Jenkins, GitLab CI/CD, Trivy, Semgrep, Gitleaks, SonarQube, OWASP ZAP, Prometheus, Grafana

Cloud & Networking: Microsoft Azure, AWS, TCP/IP, VLANs, VPN, OSPF, IPv6, NAT, TLS/SSL, IPsec

AI & Data: Scikit-learn, XGBoost, Random Forest, KNN, TensorFlow, YOLOv5, RAG, Ollama, BM25, Embeddings

PROFESSIONAL EXPERIENCE

Final-Year Engineering Intern – Tunisian Saudi Bank (TSB)

Feb–Jul 2026

Secure Cheque Monitoring Platform and Privacy-Preserving RAG Assistant

- Designed and developed a secure banking platform for cheque lifecycle monitoring, PECC operations, compensation, reconciliation, anomaly management, and centralized supervision.
- Built microservices and web modules using **Spring Boot, Angular, Oracle, API Gateway, JWT, RBAC**, and agency-based access control through **COD_UG**.
- Developed a local AI assistant using **FastAPI, Ollama, SQLite, SQLAlchemy, relational RAG, BM25, embeddings**, and intent-based routing to controlled Cheque and PECC services.
- Protected sensitive banking data through token validation, role and agency controls, masking, rate limiting, output filtering, and audit logs, with **no model training on sensitive data, no direct AI access to Oracle, and no free SQL generation**.
- Integrated real-time **SSE notifications**, Docker deployment, security monitoring, and blockchain-based traceability for critical banking events.

Cloud Security & AI Integrity Intern – ESPRIT

Jul–Sep 2025

- Developed a SaaS platform for academic integrity and AI-assisted cheating detection, evaluated by more than **30 users**.
- Implemented secure authentication, password recovery, activity tracking, and automated anomaly analysis of Excel logs.

AI & Computer Vision Intern – Sagemcom

Jul–Sep 2024

- Developed a Django-based PCB defect detection solution using **YOLOv5**, improving detection accuracy by **25%** and reducing inspection time by **30%**.

Cloud Security & Azure Infrastructure Intern – RFC

Feb–May 2023

- Secured more than **15 Azure resources** using Sentinel, Defender for Cloud, Key Vault, Logic Apps, MFA, and Azure AD PIM.
- Managed more than **100 privileged identities** and automated cloud incident-response workflows.

KEY PROJECTS

DevSecOps CI/CD Pipeline and Security Monitoring

Oct–Nov 2025

- Built a Jenkins pipeline integrating **Docker, Trivy, Semgrep, Gitleaks, SonarQube, and OWASP ZAP** for automated SAST, SCA, and DAST scans.
- Centralized security findings and pipeline metrics through PostgreSQL and professional Grafana dashboards.

Threat Intelligence Ecosystem for a Banking SOC

Jan–May 2025

- Designed a SOC ecosystem using **Wazuh, TheHive, Cortex, and MISP** to automate alert correlation, incident triage, and threat-intelligence sharing.

Smart Connected Bracelet IoT Platform

Jan–May 2024

- Developed a Symfony backend and Java mobile application for secure real-time patient monitoring.

CERTIFICATIONS & AWARDS

AWS Academy Graduate – Cloud Security Foundations (2025) | **NVIDIA – Building LLM Applications with Prompt Engineering** (2025)

Cisco Network Security (2025) | **Hashgraph Developer Course** (2025) | **12th ESPRIT Project Gala** (2025) | **Innovation Camp – 4C ISI & INJAZ** (2021)
